Module Description

- This TCD one-day scientific workshop is focused on practical training, specifically for children with an emphasis on sickle cell disease. It covers key aspects like understanding Doppler waveforms hemodynamics and diagnostic criteria, providing attendees, whether beginners or specialists, with increased confidence and accuracy in addressing clinical challenges related to children's brain circulatory disorders.

Training & Educational Objectives

1. Building confidence in TCD usage to improve diagnostic accuracy for pediatric age group.
2. Demonstrating and applying standard TCD scan techniques for participants.
3. Recognizing TCD characteristics in various brain circulatory disorders in children, especially in sickle cell disease.
4. Getting knowledge about the clinical applications and limitations of TCD examinations.
